

Regional Training on the use of Drones, Satellite Imagery and GIS for Agriculture in the Asia Pacific organized at the AIT in Bangkok by FAO from 4-9 June 2018 with active APAARI participation

Officials from FAO, APAARI, AIT, ITU, Digital Globe at the opening session

Family Photo of participants

Introductory lesson and hands on sessions

The training in earnest: Cross pollinating experiences across Asia Pacific

The success story from the Philippines: steps ahead of the others in the region

Innovation still timid in Africa due to policy and training

Assiduity rewarded at the end of the training.

The future is brighter for agricultural innovation in the Asia-Pacific
